

# MYSTIC HD

## ELECTRICAL REQUIREMENTS

The **MYSTIC HD** System requires the following electrical service:

1. A dedicated grounded GFI 120 VAC, Duplex, 20 AMP outlet, and a grounded 220 VAC, single phase 20 AMP (Min) outlet, located within four feet of the back of the Mystic Tan HD System.  
(if you are in a 220-240v country, electrical requirement is 220-240v 50/60hz)

### 220 VAC, single phase 20 AMP (Min) outlet

2. The MYSTIC HD System can be enabled using a T-Max timer 3A to link with salon management software. If you do not have a 3A timer, please order one from MT Industries, Inc. If the MYSTIC HD System is to be connected to the salon T-Max system, please ensure that all proper communication cables are present with enough length to reach the back of the machine plus an additional 5 feet.
3. The MYSTIC HD System can also be controlled through its integrated Touchpad.
4. All electrical work must be completed according to local building codes.
5. MT Industries, Inc. customer service tech is not responsible for electrical service installation.
